Economics - Course Syllabus

Description:

Study the choices that societies make regarding the production, distribution, and consumption of goods with Economics: Work and Prosperity. This course explains the economic principles of production, supply and demand, competition, inflation, and saving. Show the link between economic freedom and political and individual freedom by encouraging free-enterprise capitalism and moral responsibility with money. With questions to consider, chapter reviews, bold terms, and a glossary, students are given principles that will help them make informed money-management decisions.

Textbook: Economics (A Beka – Code 202193)

Course objectives:

- Understand the connections and applications between economic principles and moral responsibility with money in everyday life.
- Show understanding of material through written assignments, quizzes, and final exam.
